1 Motivation

During Economy Week (Deutsch: Wirtschaftwoche), as an exercise in *business administration*, we *played* a game, where you were the board of a company manufacturing some arbitrary product and had to make decisions to increase sales, lower cost and generally beat out your competition. For me, the aspect of being able to come up with novel management ideas and compete with your friends really hooked me into the concept. This may sound hyperbolic, but during that week I genuinely woke up excited to go to school, not to actually learn stuff (and whatever) but just to play a few more rounds and (aspirationally) completely destroy my competition.

The game we got to play during Economy Week, in my opinion, had a tantalising hook but the interface was utterly hostile to non-directed interaction: it was pretty much an excel table! Anyway, I set off to make a better, deeper version of this simulation.

"We do this not because it is easy, but because we thought it would be easy"

Not JFK.

This is the running motto of this project.

2 Goals

The main goals of this project are to make

1. A multiplayer game where you lead a company within a market
2. Have it work
3. Document what I learnt, how and why I did what I did

3 Technology
